SUBJECT	Lower Secondary Maths Year 8
TOPIC	Module Six
ASSIGNMENT	Six
STUDENT NAME	

FEEDBACK AND REFLECTION:

- ☐ I have read the feedback on my last assignment carefully.
- ☐ I have considered whether any of that feedback is relevant to this assignment.

One thing I will try to do either the same or differently in this assignment as a result of my previous feedback is: ____

____

____

____

ASSIGNMENT GUIDANCE

- Make sure you write your full name clearly in the box at the top of this page.
- Please **write** your answers **by hand** in **black ink** on this question paper unless you have obtained specific permission to submit typed work.
- This is not a timed assignment. We estimate that this assignment may take you between 30 and 40 minutes. However, if you need to take longer, then please do so.
- You are not expected to complete your assignments without referring to your notes or coursebook.
- In order for maximum marks to be awarded, for any question worth more than one mark, please show your workings to make your method clear.
- Calculators are **not** to be used in this assignment.

LS Maths Assignment Six

1. Show how you would solve these equations, by clearly showing how you have balanced both sides. Show how you can check your solution by substituting your answer into the original equation. As an example, the first question has been done for you:

   $6 + a = 13$

   Method: $6 + a - 6 = 13 - 6$

   Answer: $a = 7$

   Check: $6 + 7 = 13$ ✓

   a. $u + 7 = 12$ (2 marks)

   b. $2v - 5 = 9$ (3 marks)

   c. $3w - 3 = 2w + 4$ (4 marks)

(Total 9 marks)

2. Solve these equations by expanding the brackets. **Show that you have checked each solution by substituting it into the original equation.**

   a. $2(h + 1) = 6$

(3 marks)

   b. $9(j + 5) = 8j - 5$

(4 marks)

   c. $2(k - 3) = 4(k - 6)$

(5 marks)

3. True or false? Circle the correct answer.

a. Opposite angles of a rhombus are equal. True False

b. An isosceles trapezium has exactly one pair of equal angles. True False

(2 marks)

4. Match each shape to its description:

4 right angles, 4 equal sides	square
4 right angles, 2 pairs of equal opposite sides	kite
2 pairs of adjacent sides, 1 pair of equal angles, 1 reflex angle	rectangle
2 pairs of adjacent sides, 1 pair of equal angles, no reflex angle	arrowhead
Looks like a pushed over rectangle	trapezium
Exactly one pair of parallel sides	parallelogram
