---

---

#### ASSIGNMENT GUIDANCE

- Make sure you write your full name clearly in the box at the top of this page.
- Please **write** your answers **by hand** in **black ink** on this question paper, unless you have obtained specific permission to submit typed work.
- This is not a timed assignment. We estimate that this assignment may take you between 30 and 40 minutes. However, if you need to take longer, then please do so.
- You are not expected to complete your assignments without referring to your notes or coursebook.
- In order for maximum marks to be awarded, for any question worth more than one mark, please show your workings to make your method clear.
- **You are encouraged to use a calculator** in this assignment and will need a pencil and ruler, protractor and pair of compasses.

## LS Maths Assignment Eight

---

1. Write these ratios in their simplest form. You must show all your workings:

a. 2 litres : 600ml (1 mark)

b. 8h : 1 day (1 mark)

c. 3km : 250m (1 mark)

(Total 3 marks)

2. 6 loaves of bread cost £7.74. **Show** how you would find the cost of:

a. 9 loaves of bread? (2 marks)

b. 4 loaves of bread? (2 marks)

(Total 4 marks)

3. Simone is 30 years old and her daughter Lisa is 6 years old.
- a. Find the ratio of Simone's age to Lisa's age in its simplest form.

(2 marks)

- b. Find the ratio of their ages in 6 years time in its simplest form.

(2 marks)

- c. How old will Simone be when the ratio of their ages is 2 : 1?

(2 marks)  
(Total 6 marks)

Do **not** round your answers to question 4.

4. Blocks of cheese are being sold at a market.

A 300g block costs £3.75, a 350g block costs £4.10 and a 500g block costs £5.28.

a. Find the cost of 10g of the 300g block.

(1 mark)

b. Which block gives the best value? Explain your answer.

(4 marks)  
(Total 5 marks)

5. Kyle travels by train most days.

The train company offers the following ticket options:

- Day ticket £3.50
- 1-week ticket £25
- 4-week ticket £90

Each ticket can be used on any train operated by the company during the period of validity.

a. How much would it cost Kyle to buy a day ticket every day for a full week?

(1 mark)

b. Which ticket gives the best value? Explain your answer.

(2 marks)

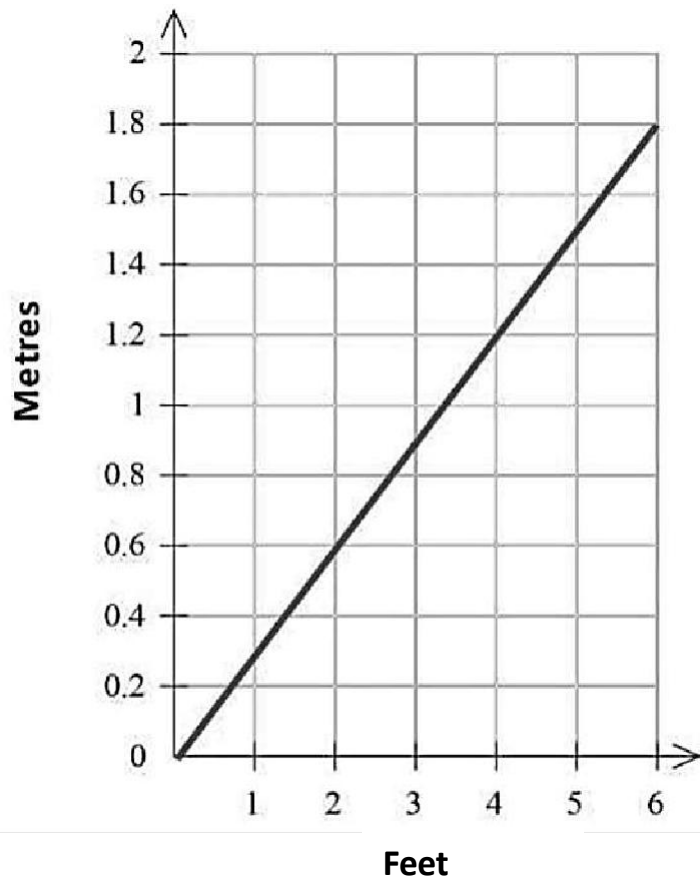

c. Why might Kyle not buy the ticket which gives best value?

(1 mark)

(Total 4 marks)

6. Show how to use the graph for the following conversions, by drawing suitable lines on the graph.

- Janet is 4 feet tall. What height is this in metres? (1 mark)
- A piece of wood is 80 cm long. What length is this in feet? (1 mark)
- A lawn is 6 yards long. Given that 1 yard = 3 feet, how long is the lawn in metres?

(2 marks)  
(Total 4 marks)

7. Ali spins a four-sided spinner twenty-two times and records the scores in the frequency table below.

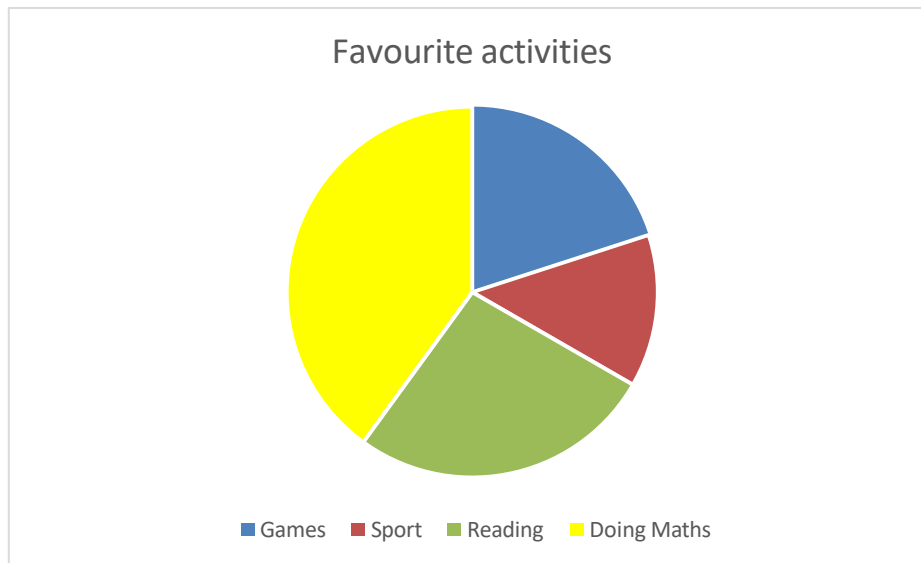

| Score | Frequency | Frequency x Score |
|-------|-----------|-------------------|
| 1     | 7         |                   |
| 2     | 4         |                   |
| 3     | 5         |                   |
| 4     | 6         |                   |
| Total |           |                   |

- a. Write down the modal score. (1 mark)
- b. Find the median score. (2 marks)
- c. Complete the table. (2 marks)
- d. Calculate the mean score. (2 marks)

(Total 7 marks)

8. This pie chart shows the favourite activities of some students.

a. What is the most common activity? (1 mark)

b. What activity is  $\frac{1}{4}$  of the activities? (1 mark)

c. Which two activities above are least popular? (1 mark)

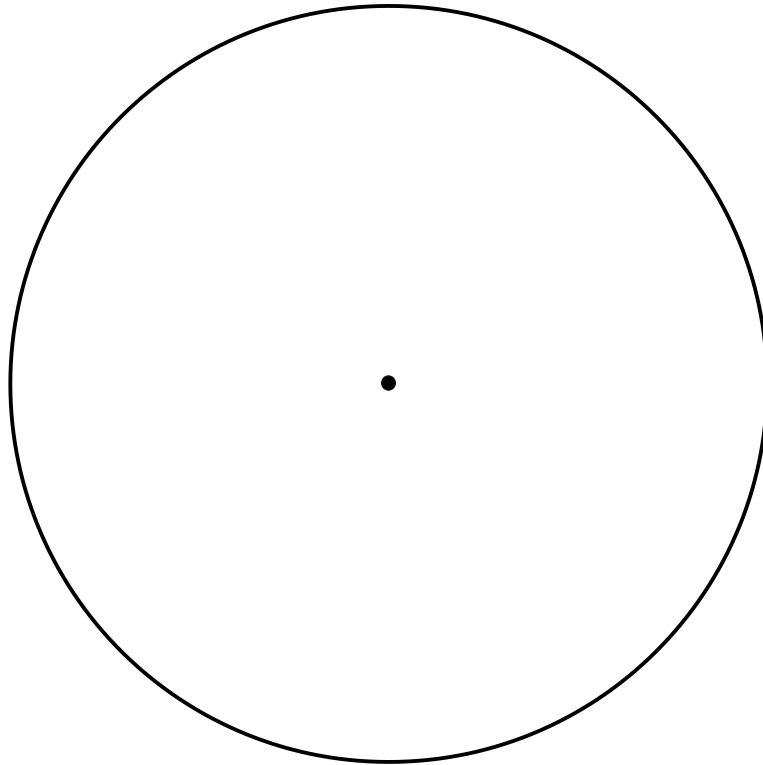

(Total 3 marks)

9. 90 students sat a Maths exam. On the way out of the hall, they were asked whether they found it hard, OK or easy. Here are the results:

| Response  | Easy | OK | Hard | No reply |
|-----------|------|----|------|----------|
| Frequency | 22   | 37 | 19   | 12       |

Show the results on a pie chart. Remember to include full workings, so it is clear how you have calculated each angle.

(4 marks)

**TOTAL FOR ASSIGNMENT 40 MARKS**
